

Garfield Re 2 Kindergarten Fall Reading Data - **AT RISK** for Reading Difficulties

In the first quarter, all kindergarteners entering Re 2 receive a Dynamic Indicators of Early Literacy System (DIBELS) benchmark assessment on initial sound fluency and letter naming fluency. The assessment yields one of three instructional recommendations. Intensive means that the child needs intensive intervention after being compared to peers nationally.

In this table, the smaller the value, the better. These data show that fewer RaR kids needed intensive intervention when they arrived in kindergarten.
